

AMAZONE

ZG-TS and ZA-TS Benefits

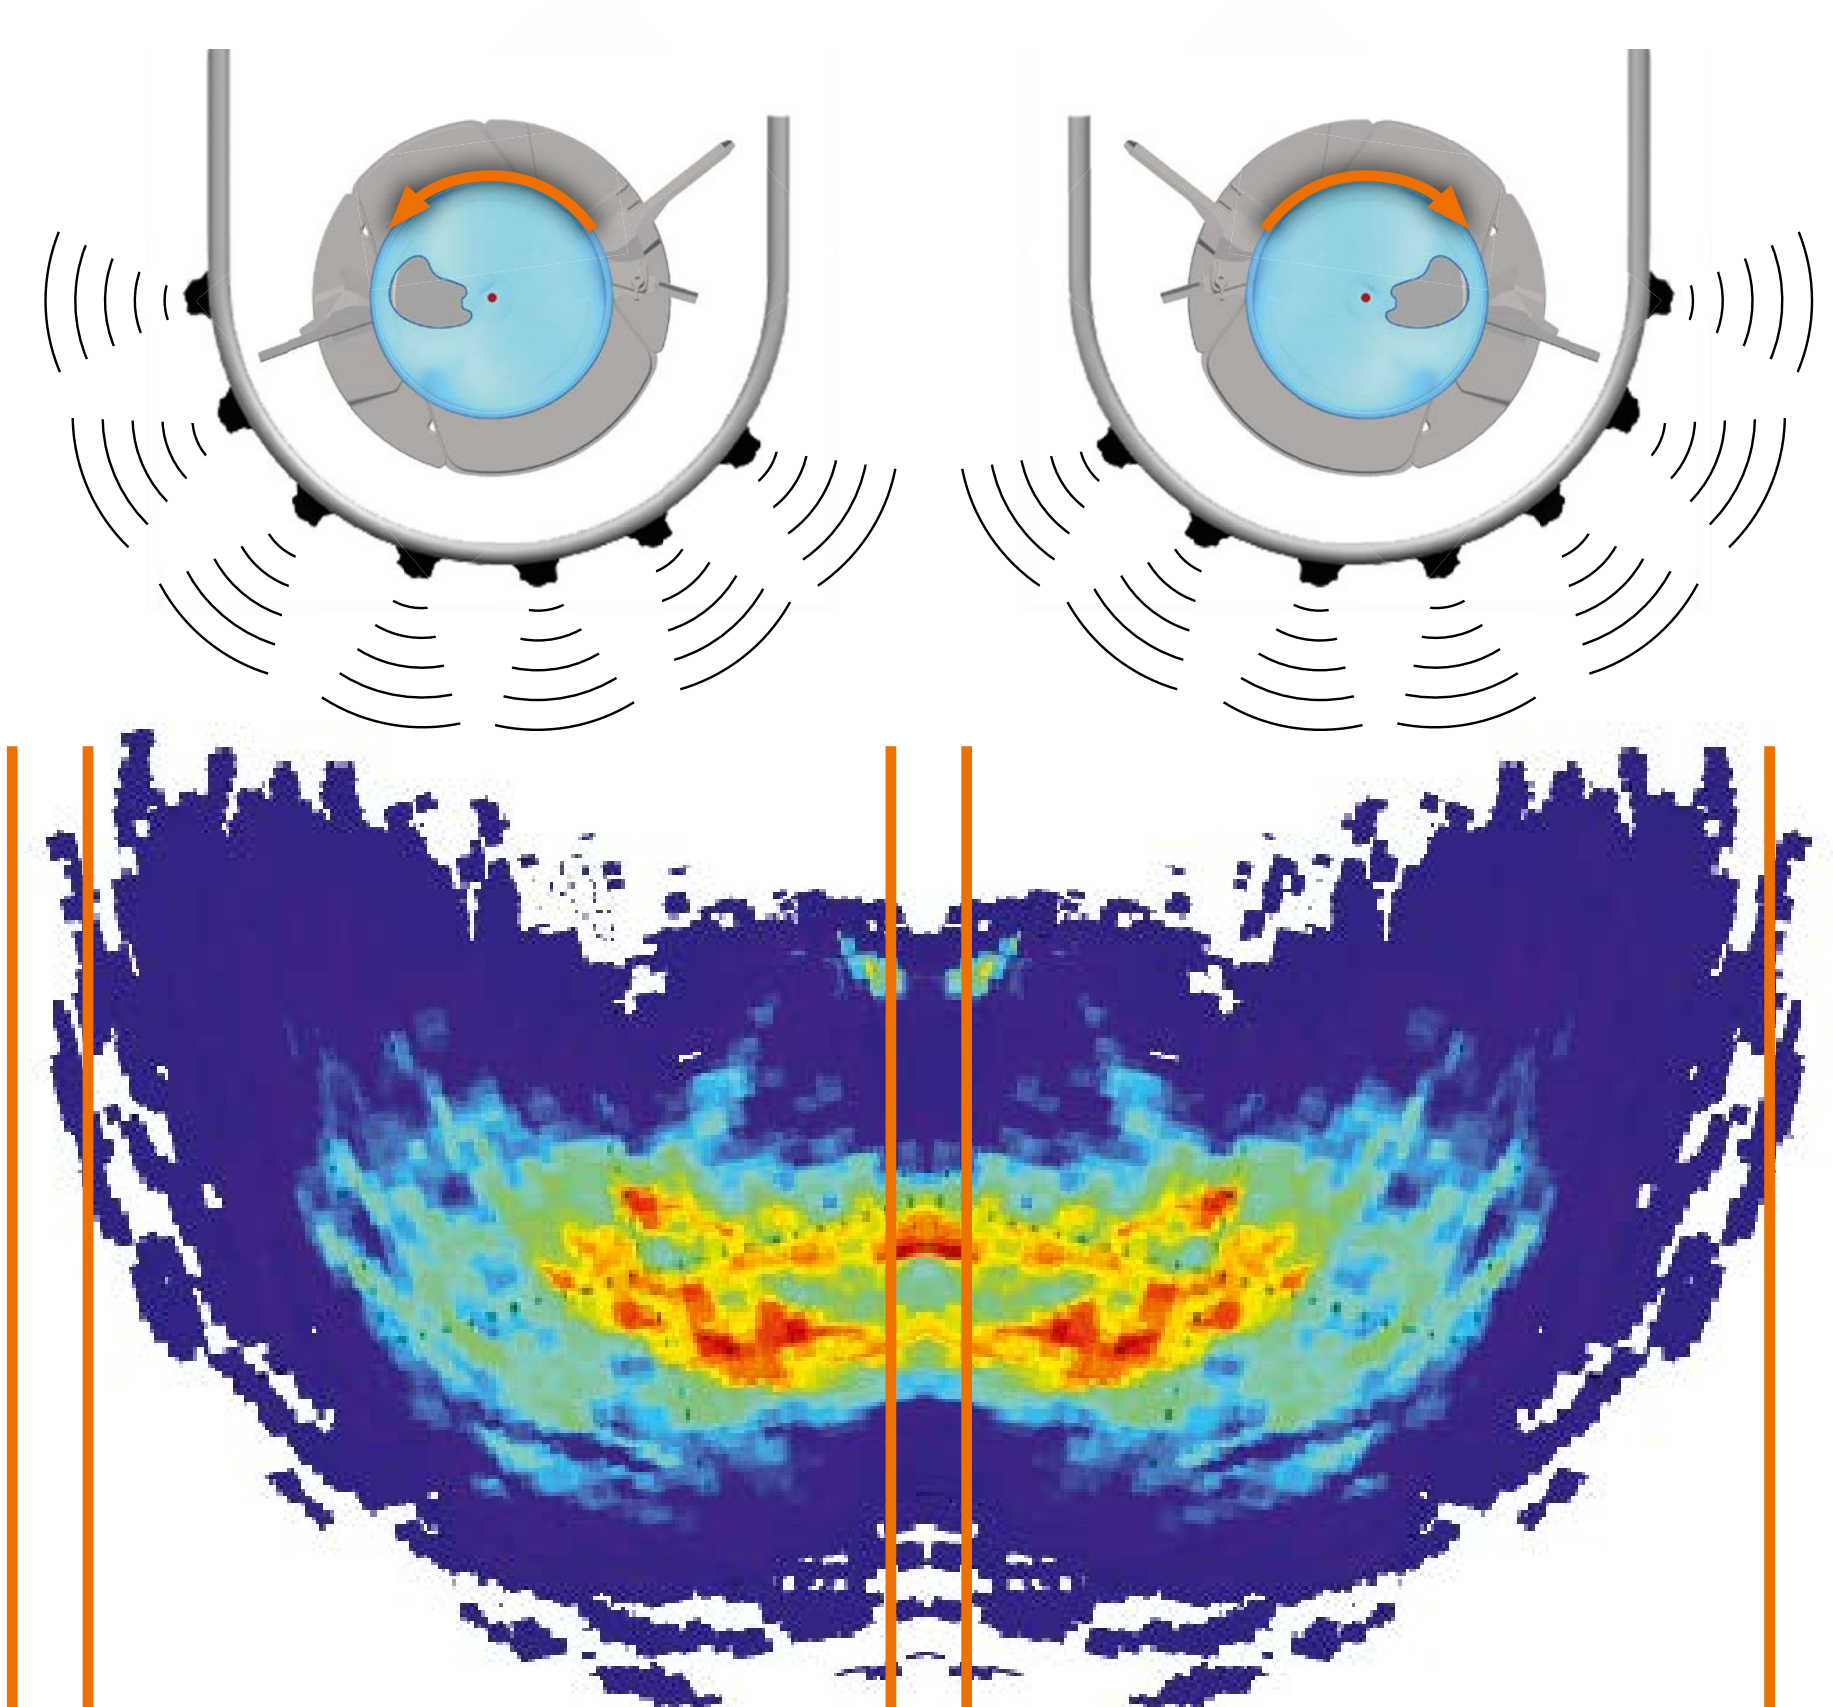

Spreading unit

- ✓ Self-adjusting drop point
- ✓ 50–180 ft working width
- ✓ Spreading capacity up to 24 lbs per second (1440 lbs per minute)
- ✓ Dynamic weighing system calculates by measuring the outflow of the fertilizer spread versus actual weight remaining in hopper

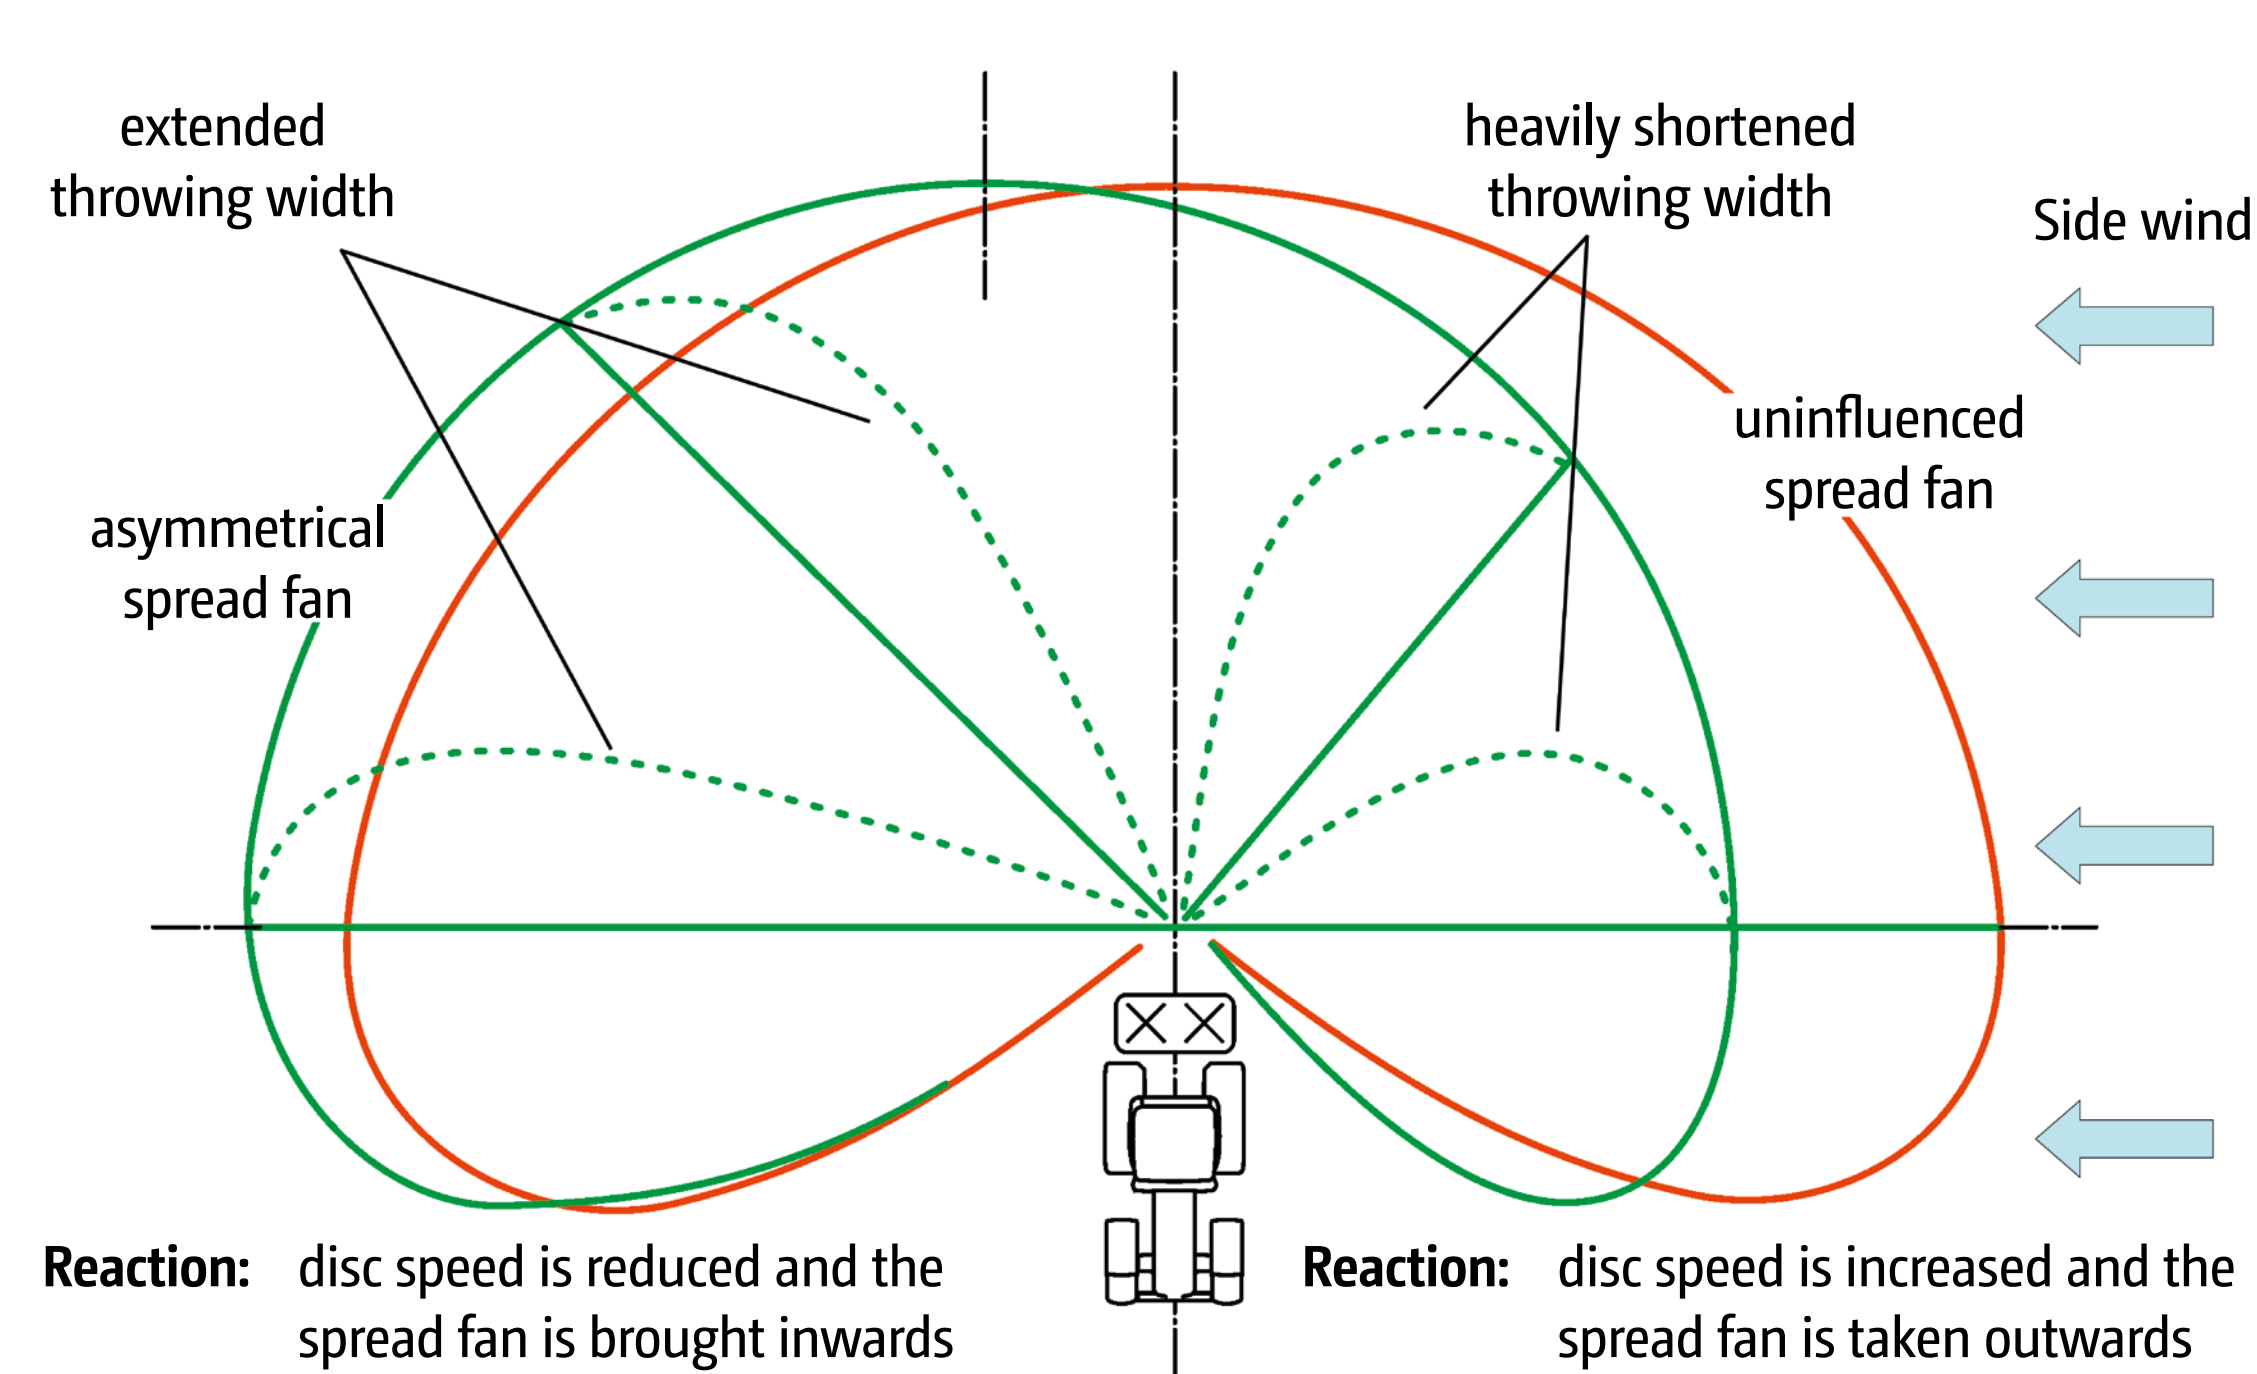

Section control

- ✓ Infinite section control in automatic mode
- ✓ 128 part-width sections

ArgusTwin

- ✓ Constant monitoring of the spread pattern
- ✓ Actual spread pattern of the fertilizer is compared to the target spread pattern and the delivery system is adjusted if necessary

Automatic compensation for wind effect

WindControl

- ✓ Stability during the spreading process by maintaining a good spread pattern even under changing wind conditions
