

AMAZONE

See the Profihopper in action!

For 25 years:
First in the morning and last in the evening

Profihopper – The mower

The Profihopper is not bothered whether the grass is dry or wet, exceptionally tall or even thick, it always achieves first class results. This is because the SmartCut exact cut rotor ensures outstanding cutting and collecting quality and the PowerCompactor collecting and conveying system, consisting of a longitudinal and a cross conveying auger, ensures the maximum area coverage under any conditions.
