Catros 03

Reliable face seal

No more lubrication – extreme service life

With no need to lubricate the disc bearings, this results in a significantly reduced overall maintenance time. Low-wear face seals have been used for decades in road construction equipment where rollers on the running gear of caterpillar-tracked vehicles have to be effectively sealed and work with complete reliability under the toughest of operational conditions.

2-row angular contact ball bearing

2 x seal ring (O-Ring)

2 x cast rings with face seal

Face seal built
into conical seats

Gear oil filled housing

Proven 1,000,000 times over!
