

AMAZONE

Get ahead of the game!

ON NOW. Make the most of these attractive early order offers on AMAZONE winter salt spreaders and take the pressure off next Winter.

Talk to your AMAZONE groundcare sales partner between April and July 2024 to benefit from up to 5% early order bonus. Promotion valid only for DE/AT. Cannot be used in conjunction with any other campaign!

Be ahead of the game when it comes to winter

EK-S – reliable and economical

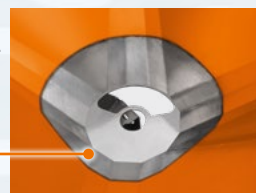

With working widths of up to 8 m (depending on the material to be spread) and hopper sizes of 150 l, 260 l and 370 l, it is perfect for medium application rates.

- ▶▶ Lightweight design for small compact tractors
- ▶▶ Manually adjustable, multi-element spread width deflector made from stainless steel
- ▶▶ **Hopper cover and protective sieve are standard**
- ▶▶ Easy pre-set slide for rate setting
- ▶▶ Maintenance-free, oil-immersed gearbox or direct drive via a hydraulic motor

E+S – the technology with Snow-how

The E+S with working widths from 1 m to 8 m provides excellent lateral and longitudinal distribution and high work rates.

- ▶▶ Steep hopper walls for optimum flow of the spreading material
- ▶▶ Important moving parts such as nuts and bolts, the entire bottom assembly, spread width deflector, spreading disc and spreading blades are made from stainless steel
- ▶▶ Extremely resistant multi-layer paint finish, powder coating and zinc phosphating extend the service life of the spreaders
- ▶▶ Available in two hopper sizes, 300 l and 750 l, and with optional bolt-on extensions up to a capacity of 1,110 l
- ▶▶ **Now also with stainless steel hopper tip**

Profit from up to 5% early order discount

salt spreaders

Comfortable and precise operation with the modern EasySet 2 in-cab terminal or the AmaTron 4 user-friendly ISOBUS terminal

IceTiger S and IceTiger – safe working in snow and ice

The IceTiger winter salt spreader is available in two sizes. The IceTiger S is equipped with a hopper which can be increased in steps up to a maximum capacity of 920 l by the use of hopper extensions. The IceTiger is its “big brother”. This has a 1,000-litre hopper which can also be increased up to a maximum capacity of 1,900 l by means of hopper extensions. The working width can be set very precisely from 1 m to 8 m, both symmetrically and asymmetrically, via the EasySet 2 in-cab terminal, the AmaTron 4 ISOBUS terminal or any other ISOBUS-compatible terminal. Ideal for narrow footpaths, wide roads or major junctions.

IceTiger S – precision down to the last detail

- ▶▶ Hopper capacity of 380 l (can be extended to 920 l max. with hopper extensions of 180 l and 360 l)
- ▶▶ W 1 and W 2 precision spreading discs with working widths from 1 m to 8 m
- ▶▶ Hydraulically-driven floor belt
- ▶▶ Manual or electric delivery point adjustment

IceTiger – precision with high efficiency

- ▶▶ Hopper capacity of 1,000 l (can be extended to 1,900 l max. with hopper extensions of 300 l and 600 l)
- ▶▶ Choice of lower link attachment positions for an optimised centre of gravity. Twin 250 l integrated brine tanks and hydraulic pump drive for a precisely adjusted brine feed
- ▶▶ W 2 precision spreading discs with working widths from 2 m to 8 m
- ▶▶ Hydraulically-driven floor belt
- ▶▶ Manual or electric delivery point adjustment

AMAZONE

Easy Going even when its snowy!

For E+S and IceTiger

EasySet 2 in-cab terminal

EasySet 2 is the ideal in-cab terminal for those looking for convenient and simple operation. With its carefully-selected partner software, the EasySet 2 in-cab terminal offers the facility for logging the machine data with a GPS reference. This data can be documented in the fleet management system.

Benefits of EasySet 2:

- ▶ Intuitive operation for multiple drivers
- ▶ Forward-speed dependent application rate control
- ▶ Pre-metering can be provided via the traffic light function before the tractor starts moving
- ▶ With manual delivery point adjustment: the delivery point is adjusted directly on the spreader; the required spread rate and the desired working width are set via the EasySet 2
- ▶ Display of the working width (m), rate (g/m²), forward speed (km/h).
- ▶ + 100% function for doubling the spread rate on critical areas, e.g. bridges and junctions
- ▶ Calibration button for calibrating the working width, speed and application rate for road salt and brine

Forward-thinking AMAZONE sales partners can benefit NOW from the AMAZONE 2024 early order bonus:

Promotion period from 15.04. 2024 to 15.07. 2024

- 5 % Early order bonus

on orders received from 15 April until 14 May

- 4 % Early order bonus

on orders received from 15 May until 14 June

- 3 % Early order bonus

on orders received from 15 June until 15 July

Illustrations, content and technical data are not binding and may differ depending on the level of equipment. Country-specific road traffic regulations apply and must be complied with, meaning that special approval may be required. The permissible axle loads and total weights of the tractor should be checked. Not all the listed combination options are possible with all tractor manufacturers.
