D8-45/60 SUPER

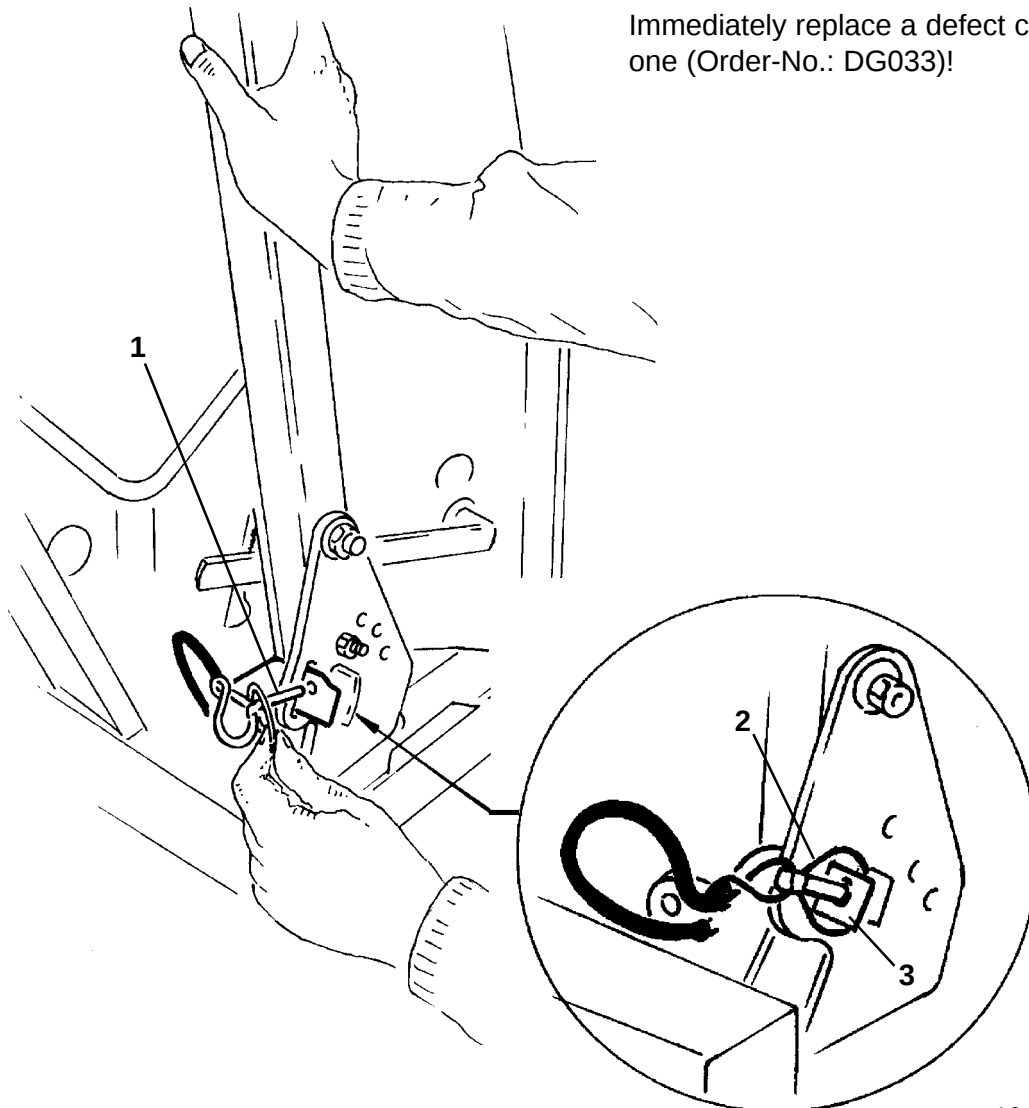

**Advice
for transport safety
of the marker arms**

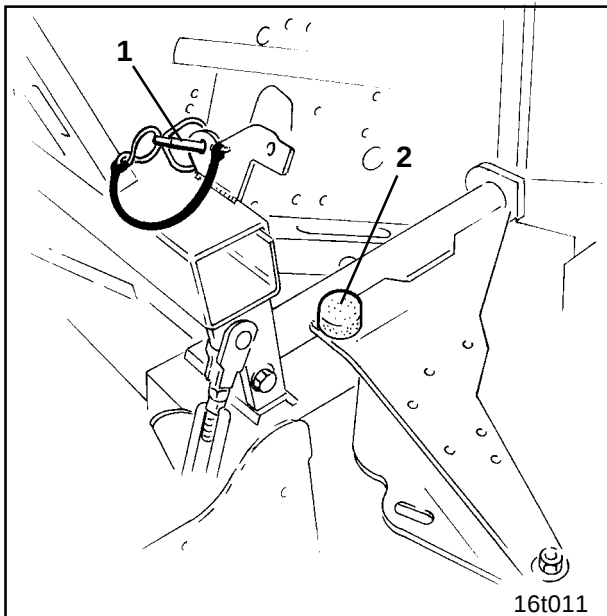

**Before any transport secure the
marker arms of your seed drill by the
attached clip pin (1)!**

Please ensure that the clip ring (2) of the clip pin
folds over the fixing bracket (3) to avoid
unintentional loss of the clip pin!

Immediately replace a defect clip pin by a new
one (Order-No.: DG033)!

16t014

Only just before starting the operation lower the marker arms! To avoid loss insert the clip pin (1) thereafter into the second hole of the fixing bracket as shown!

Do not remove the rubber blocks (2) and replace if they are worn out!

The rubber blocks prevent forgetting to ensure transport safety by the clip pins.
