ZG-TS Truck – High efficiency between yard and field

Pack top spreader for mounting on a carrier system | 7,500 l or 10,000 l | 15 m – 54 m

» ArgusTwin

Radar system for optimised lateral distribution.

» Unique WindControl system

Designed by Prof. Dr. Karl Wild, HTW Dresden, for optimisation of the spread pattern in windy conditions.

» TS spreading system

With delivery system adjustment and disc-integrated AutoTS border spreading system.

» ProfisPro weighing system

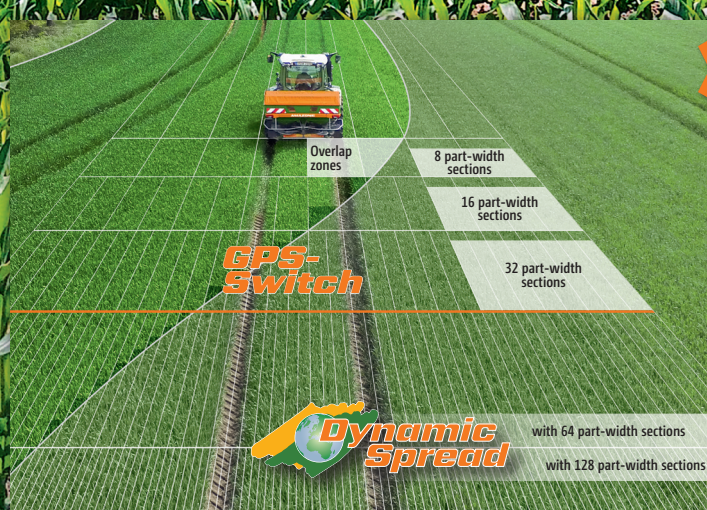

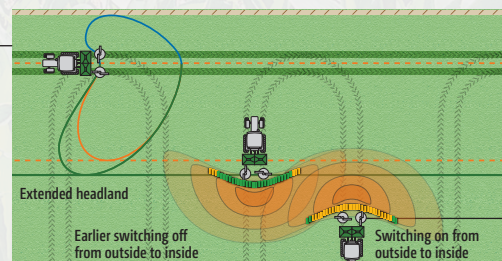

Perfect combination of the Profis weighing system and the FlowControl torque measuring system.

» DynamicSpread dynamic part-width section control

The automatic part-width section control with up to 128 part-width sections in the form of a kidney-shaped pattern guarantees high precision switching in wedge shaped fields or at the headland. Outer part-width sections can also be controlled.

HeadlandControl

Optimum and even lateral distribution at the headland
