

# QuickLink quick coupling system

Quick combination changeover for rigid models

KE 3002-190 with Centaya 3000 Special

Thanks to the intelligent QuickLink quick-coupling system for all harrow-mounted drills and seeders, the sowing combination can be separated with ease in just a few minutes. The three easily accessible coupling points of the QuickLink system ensure a safe, tool-free and fast coupling and

uncoupling process. As a result, the soil tillage machine is also perfect for solo use. Seed drills with a mechanical fan drive can also be used in combination with the KE 02 thanks to the PTO through drive shaft.
